**Questions or concerns I have?**

- Stakeholders have commented on some of their needs for improvement. I’m not sure how much of this will be implemented since our objective for the committee is the “what”, not the “how”
- I think we need to have a comprehensive plan but implement that plan in a controlled, thoughtful manner. Not too much too soon.
- If we would like to share with our stakeholders when it’s a timely “date”
- None – this process is going well and progressing as expected
- Hopefully with this, community members will understand purpose of this!

**Additional information, resources and/or support I will need to be successful ...**

- I look forward to sharing this with staff and community

**I want you to know...**

- Look forward to end product
- Great group work time
- I like the final mission/vision statement
- I think we must not lose sight of those things we are doing well in the district just for the sake of change. We need to continue to focus on high academic standards and performance and use technology as a tool to achieve our goals.
- The level of brainstorming with adequate breaks (mental) was great.
- I’m starting to really see our work take shape – it’s exciting!
- Students should be able to give teacher evaluations/fill out surveys, especially at the high school level.
- I feel good about the process made to date.
- Perry continues to be a fantastic facilitator – very objective and knowledgeable
