### **Questions or concerns I have?**

- Concerned about what we add to the workload of teachers/administrators and thinking about what we then need to take away to make the process effective & participants willing.
- A little overwhelmed about the amount of data to be disseminated
- That we can set concrete goals and the means to achieve them
- I see very little diversity in the planning committee. Diversity in ethnicity and my guess is very little diversity in economic status.
- My value on this committee. I'm hoping that I will be helpful in this process.
- Will "character" goals & education be a part of our vision? (not just academics)

### **Additional information, resources and/or support I will need to be successful...**

- I am looking forward to learning how I will get the information back to other parents
- I want to know if there is some type of budget for communicating to my constituents. How many people count as my constituent population?
- I love data/information – the more the better
